

## **Myovant Sciences to Host Webcast and Conference Call at 8:30 a.m. Eastern Time Tuesday, May 14th to Discuss Results from Phase 3 LIBERTY 1 Study Evaluating Once Daily Relugolix Combination Therapy in Women with Uterine Fibroids**

May 13, 2019

BASEL, Switzerland, May 13, 2019 (GLOBE NEWSWIRE) -- Myovant Sciences (NYSE:MYOV), a clinical-stage healthcare company focused on developing and commercializing innovative therapies for women's health and prostate cancer, today announced it will hold a webcast and conference call beginning at 8:30 a.m. Eastern Time / 5:30 a.m. Pacific Time on Tuesday, May 14<sup>th</sup> 2019 to discuss results from the Phase 3 LIBERTY 1 study of once daily relugolix combination therapy in women with uterine fibroids and heavy menstrual bleeding.

### **Webcast/Teleconference Details**

To participate in the live conference call, please dial 1-866-807-9684 for domestic callers and 1-412-317-5415 for international callers. A live webcast of the conference call will also be available on the investor relations page of Myovant's website at [investors.myovant.com](http://investors.myovant.com). After the live webcast, the event will remain archived on the Myovant website for at least 30 days.

### **About Myovant**

Myovant Sciences aspires to be the leading healthcare company focused on innovative treatments for women's health and prostate cancer. Myovant's lead product candidate is relugolix, an oral, once daily small molecule that acts as a GnRH receptor antagonist. Myovant has three late-stage clinical programs for relugolix ongoing in uterine fibroids, endometriosis and prostate cancer. Myovant is also developing MVT-602, an oligopeptide kisspeptin-1 receptor agonist, and has completed a Phase 2a study for the treatment of female infertility as part of assisted reproduction. Myovant Sciences is the majority owner of Myovant. Takeda Pharmaceuticals International AG granted Myovant an exclusive, worldwide license to develop and commercialize relugolix (excluding Japan and certain other Asian countries) and an exclusive license to develop and commercialize MVT-602 in all countries worldwide. Over time, Myovant intends to expand its development pipeline to include other potential treatments for women's health and prostate cancer. For more information, please visit Myovant's website at [www.myovant.com](http://www.myovant.com). Follow @Myovant on Twitter and LinkedIn (<https://www.linkedin.com/myovantsciences>).
